

## **Risk Assessment Team Building Workshop – 4 hours**

Students will learn how to build Risk Assessment Teams in their own jurisdictions to conduct Risk Assessments on their identified CIKR. Students will apply working knowledge of risk and how it affects the critical infrastructure in their community by working collaboratively with public and private sector partners in building a team assessment program.

Students will gain a practical understanding of the National Infrastructure Protection Plan (NIPP), the Risk Management Framework (RMF), Presidential Policy Directive 8; National Preparedness (PPD-8), and National Preparedness Goal, and the ACAMS system, and utilize MSHARPP+V to prioritize crucial critical infrastructure assets for assessment.
